B.QUIET Pods

Rapidline B.Quiet Acoustic Pods are the perfect solution for providing privacy and confidentiality in today’s modern open plan office.

Offering a cost-effective and efficient way to ensure conversations, phone calls and video conferences remain uninterrupted and private, the B.Quiet is an excellent addition to any workplace.

With a simple, sleek design, the pod fits effortlessly, taking up minimal space and can be relocated when required.

SOUND ABSORBING

Materials & construction

Egg crate acoustic foam

Egg crate foam provides strong noise reduction and is widely used for sound control in recording studios, vocal booths and control rooms. The foam also assists with reverberation reduction and echo prevention for clear audio.

A sandwich element chassis

Acoustic sandwich elements are made from fire-safe materials including sheet metal, gypsum board, recycled acoustic foam and acoustic felt with excellent noise-insulating and noise-absorbing properties.

Acoustic absorption panel

Composed of compressed mineral wool or foam, sound absorbing acoustic panels absorb sound waves to reduce general noise, clarify speech and limit reverberation in walls within enclosed areas.

CONVENIENT

Portable & easy to assemble

Save space

The bottom of the Rapidline Acoustic Pods are fitted with 4 heavy duty castors for easy movement and relocation. When the pod is in the desired position, the castors can be retracted and leveling feet activated.

Save time

The installation of the Acoustic Pod is quick and efficient. You're not waiting for someone to measure, cut, and assemble each panel. The entire pod is made of prefabricated modules and can be easily installed by a small crew within hours.

Save cost

The Rapidline Acoustic Pods save on material costs, labour, delivery and storage fees, while providing a space for employees to take private phone calls and host meetings in an open office environment without the need to relocate to a larger office building.

COMFORT

Built-in features targeted at user experience

Materials

Door: German doorware

Glass: 10mm safety glass with aluminium frame

Floor: Anti-static and stain resistance low loop pile carpet

Features

Fans: Fitted with ventilation fans, controlled by a door triggered sensor

All Sizes - Built-in table surface

Meeting & large pod only - Built-in seating in the meeting size pod

Specifications

Noise reduction: Up to 30DB

Power consumption:

Single and Work Pods - 10W; 4W light, 6W fans

Meeting and Large Pods - 18W; 6W light, 12W fans

PRODUCTIVITY

By design

Productivity

The average distraction time is every 11 minutes, and 25% of lost time is due to distractions in or near work areas. Providing a place where people can escape visual and audio disruptions assists with increased concentration and productivity.

Ventilation fans

Filtering fresh air in from the outside helps circulate air through the pod, preventing users from breathing stuffy, less oxygenated air, and keeping the space fresh and inviting.

Ergonomic design

Ergonomic furniture design improves posture and alignment of the spine, it prevents arthritis and reduces the number of work related injuries.

ECO FRIENDLY

ISO 16000-6 tested

When you choose Rapidline B.Quiet Acoustic Pods, you can have peace of mind knowing less harmful pollutants, such as volatile organic compounds (VOCs) are released into the office air for your employees to breathe. Paints, fabrics, furniture, carpets and building materials all often release VOCs that cause allergies, migraines and asthma. According to a report by the European Respiratory Review, “The possible health effects of indoor VOC exposure are a cause for concern, given that people in general, and children in particular, now spend most of their time indoors.”

Chemical	Rapidline Acoustic Pod Test Results	Occupational Safety and Health Administration (OSHA) Permissible Exposure Limits (PELs)
Formaldehyde	0.008 mg per cubic metre	0.614 mg per cubic metre
Benzene	0.0034 mg per cubic metre	3.195 mg per cubic metre
Methylene Chloride	0.0232 mg per cubic metre	87 mg per cubic metre
Toluene	0.0333 mg per cubic metre	638 mg per cubic metre
Hexane	0.129 mg per cubic metre	1800 mg per cubic metre

ECO FRIENDLY

Preventing deforestation

Fifteen Trees

The role of forests is fundamental for the conservation of the planet, they not only retain 45% of the carbon of the earth’s surface, but also contain a large amount of flora and fauna that is vital to our ecosystem. Choosing eco-friendly furniture alternatives such as the Rapidline B.Quiet Acoustic Pod helps to prevent deforestation and illegal logging of endangered species.

To further lower our carbon footprint and reduce carbon emissions, as a company, we have proudly partnered with Fifteen Trees, an Australian-owned independent reforestation organisation. Partnering with Fifteen Trees allows us to take further positive steps towards reducing our environmental footprint, protecting and restoring Australian rainforests, and supporting local indigenous businesses through the supply & localised planting of trees.
