

ORIGINAL HIVE HANGING CEILING PANELS

SKU: AP-MSHIVEHCPOG

Elevate your acoustic strategy by activating the largest unused surface in the workplace. Acouline Halo & Hive Ceiling Panels are suspended overhead to capture and soften sound before it can reflect back into the room, helping create a calmer and more balanced environment. Working quietly above the workspace, they reduce reverberation and lower overall noise levels while contributing a refined architectural feature. Available in a range of configurations, Hive Ceiling Panels deliver effective acoustic performance without compromising valuable floor or wall space.
