HALO & BOOST
WORKSTATION RANGE

Introducing the Rapidline Halo and Boost range. The pinnacle of ergonomic excellence, our flagship models are designed to enhance productivity and comfort in your workspace.

The Halo+ and Boost+ ranges are symbols of unparalleled excellence. Their sleek profiles, customisable features, and intuitive controls redefine the standards for premium workstations. Effortlessly customise your workspace with a user-friendly digital control panel, accompanied by anti-collision technology and whisper-quiet operation.

Complementing Halo+ and Boost+ is Rapidline's exciting new Executive workstation range. Boasting the same modern features, Halo+ and Boost+ Executive includes an integrated side cabinet storage system, making it an exemplar of contemporary corporate comfort.

Leading alongside are the Boost Light and Boost Crank, offering cost-effective height adjustable solutions with premium features. For those looking to combine affordability with quality, Boost Static and Halo Static provide exceptional durability as ergonomic fixed-height workstations.

ACOUSTIC PODS

B.QUIET®
Pods

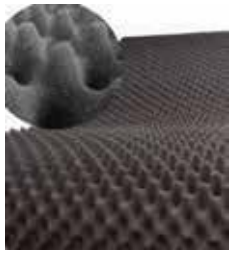

Rapidline B.Quiet® Acoustic Pods are the perfect solution for providing privacy and confidentiality in today's modern open plan office, boasting a Greenguard Gold certification and finish customisation range to suit your needs.

Offering a cost-effective and efficient way to ensure conversations, phone calls, and video conferences remain uninterrupted and private, the B.Quiet® is an excellent addition to any workplace.

With a simple, sleek design, the pod fits effortlessly into any office environment, taking up minimal space and can be relocated when required.

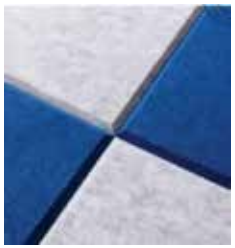

SOUND ABSORBING
MATERIALS & CONSTRUCTION

Egg crate acoustic foam
Egg crate foam provides strong noise reduction and is widely used for sound control in recording studios, vocal booths, and control rooms. The foam also assists with reverberation reduction and echo prevention for clear audio.

A sandwich element chassis
Acoustic sandwich elements are made from fire-safe materials including sheet metal, gypsum board, recycled acoustic foam, and acoustic felt with excellent noise-insulating and noise-absorbing properties.

Acoustic absorption panel
Composed of compressed mineral wool or foam, sound absorbing acoustic panels absorb sound waves to reduce general noise, clarify speech, and limit reverberation in walls within enclosed areas.

CONVENIENT
PORTABLE & EASY TO ASSEMBLE

Save time
The installation of the Acoustic Pod is quick and efficient. You're not waiting for someone to measure, cut, and assemble each panel. The entire pod is made of prefabricated modules and can be easily installed by a small crew within hours.

Save space
The bottom of the Rapidline Acoustic Pods are fitted with 4 heavy-duty castors for easy movement and relocation. When the pod is in the desired position, the castors can be retracted and leveling feet activated.

Save cost
The Rapidline Acoustic Pods save on material costs, labour, delivery, and storage fees, while providing a space for employees to take private phone calls and host meetings in an open office environment without the need to relocate to a larger office building.

Single Acoustic Pod

BQ-SPOD BL-GP18-BK

Specifications:

Overall Size	1030W x 1030D x 2245H
Internal Size	910W x 910D x 2165H
Wall-Mounted Table	600W x 300D (2x 50mm Radius Corners) x 25H
